

Introduction of different types of disc brake chambers at our plant in Turkey

In order to ensure parts availability, SAF-HOLLAND will introduce different types of disc brake chambers on axles manufactured at our plant in Turkey from January 1, 2026:

Current versions			New versions at SAF-HOLLAND Turkey		
Type	Part number	Test report	Type	Part number	Test report
MO S 1600 A 60	04 454 1065 60	BC 0060.3	MO S 1600 A 20	04 454 1065 20	BC 0240.1
MO S 1800 C 60	04 454 1066 60	BC 0061.3	MO S 1800 C 20	04 454 1066 20	BC 0241.1
MO S 2000 A 60	04 454 1067 60	BC 0062.3	MO S 2000 A 20	04 454 1067 20	BC 0242.1
MM S 1624 A 60	04 454 1077 64	BC 0044.3	MM S 1624 A 20	04 454 1077 24	BC 0237.1
MM S 1824 C 60	04 454 1074 64	BC 0045.3	MM S 1824 C 20	04 454 1074 24	BC 0238.1
MM S 2024 A 60	04 454 1079 64	BC 0046.3	MM S 2024 A 20	04 454 1079 24	BC 0239.1

Important note: If you purchase axles from SAF-HOLLAND Turkey, updates to existing system and vehicle approvals, considering the new brake chamber types, will be necessary.

Note for customers purchasing only axles from our plants in Bessenbach:

When creating brake calculations and brake system approvals, please ensure that you select the correct (current) version of brake chambers. These can be recognized by the number "6" in the second last position of the article number and the type of designation.

Note for customers purchasing axles from SAF-HOLLAND Turkey:

Both brake chamber types for the corresponding brake chamber size have the same performance characteristics. Thus, existing brake system configurations can be kept.

The new brake chamber types must be taken into account in the system and vehicle approvals. Therefore, we kindly ask you to include the new brake chamber types in your brake calculations and approvals.

The necessary test reports can be found on the SAF-HOLLAND homepage at the Download-Center:

[Download-Center: SAF-HOLLAND](#)

Please ensure that your system and vehicle approvals are updated accordingly until end of 2025 taking the additional brake chamber versions into account.
