

Updated test reports for SAF-HOLLAND disc brake chambers

The **type designations** of the SAF-HOLLAND disc brake chambers have been **modified** as shown in the table below.

All technical performance parameters relevant for the approval of the brake chambers remain unchanged.

It is thus not a problem to have a mixture of brake chambers of both the old and the new type designation installed.

The listed **test reports in accordance with Annex 19-Point 2.4 to ECE Regulation No. 13** have already been modified to give the new type designation and updated in line with the latest version of ECE Regulation No. 13 (compare too with Point 0. Reason for the extension in the relevant test reports on the application of Annex 19 – Part 1 Point 2.4 of ECE Regulation No. 13). The test reports are available as of now on the SAF-HOLLAND homepage:

<http://www.safholland.de/de/de/sales/test-reports/brake-chambers>

We recommend that you incorporate the test reports you require in their updated form in your records the next time you update your approval documentation.

The changeover will take place gradually **from September 2018**. During the transition period, brake chambers with either the new or the old type designations may be dispatched.
