

Introduction of the new SAF-HOLLAND self-setting automatic slack adjuster from 1st February 2015

SAF-HOLLAND has adapted the new self-setting, fully automatic slack-adjuster for use with the SAF INTRADRUM rigid axle.

From February 2015, it will be fitted as standard on drum brake SNK 420x180.

Fig. 1: SAF INTRADRUM

Fig. 2: SAF slack adjusters

Characteristics of the new slack adjuster:

- Fully automatic
- Rugged, robust
- Requires little maintenance
- Easy, safe and rapid installation
- Various installation positions thanks to flexible control arm positions

It is different to the Haldex S-ABA in the design of its control arm:

Important:

The slack adjusters must be included in the vehicle type-approvals.

Brake	Brake test report	Slack adjuster type	SAF Article code	Model	Confirmation	Extension	Test report
SNK 420x180	TDB0381	SAF6Y5	04 175 0374 00	P06	110159	--	GS0037.0
	TDB0483				110158	--	GS0038.0

Please note that it is not permissible to combine HALDEX S-ABA and SAF slack adjusters on one axle. The conversion to the SAF slack adjuster must always be carried out in pairs.

The HALDEX S-ABA slack adjuster continues to be available as an option.
