

Modification of the sealing for the floating guide pin of KNORR disc brake calipers SN6 and SN7 for SAF-HOLLAND

The Company **KNORR-Bremse** will equip all types of disc brake calipers KNORR SN6 and SN7 for SAF-HOLLAND with **modified sealings** for the floating guide pin instead of the known rubber boot sealing because of patent issues. The modification will be introduced into production in **April '10**

The following part numbers will be affected by this modification.

Disc brake caliper	SAF p/n
KNORR SN6 (SAF SBK1937)	03 080 0024 21
	03 080 0025 21
	03 080 0061 20
	03 080 0062 20
KNORR SN7 (SAF SBK2243)	03 080 0048 20
	03 080 0049 20

Previous design:

**Rubber boot
sealing**

New design:

KNORR SN6: Open sealing

**KNORR SN7: Complete covered
DU guide pin**

The corresponding spare part kits for the brakes above will be also modified with the new sealings.

Please notice, that all types of the **KNORR SK7** for SAF-HOLLAND are **not affected by the modification of the sealing for the floating guide pin.**
