

**Lock nut M 20x1.5 for shock absorber mounting bolt INTRA suspension  
SAF Part-No. 4 247 4044 10**

As part of our continuous replacement parts standardization program for SAF suspension components we introduced now the well proved All-steel-flange-lock nut for the shock absorber fixing bolts.

The lock-nut can be reused and will operate at identical torque settings as the previous hex-nut:

		material	surface	torque setting Nm	remark
upper mounting	hanger bracket	steel	dry	600	
			greased	500	
	aluminium	dry	400	additional retorque inspection	
		greased		not allowed	
crossmember	steel	dry	600		
			greased	500	
lower mounting	functional suspension arm	steel	dry	600	
			greased	500	

Previous:  
Hex-flange nut

Available now:  
Steel lock nut
