

Discontinuation of series production of the disc brake SBW1937 (Wabco PAN 19-1)

The disc brake SBW1937 (Wabco PAN 19-1) will be discontinued in the second quarter of 2025 and will then no longer be available in its current version. The reason for this is the discontinuation of the previous brake pad material Jurid 539 by the pad manufacturer.

SAF-HOLLAND will therefore stop delivering disc-braked axles with the SBW1937 brake (Wabco PAN 19-1) for new vehicles on July 1, 2025. This affects the test reports TDB0678 and TDB0749.

Brake calipers with carrier, without brake pads, can still be obtained from the SAF-HOLLAND aftermarket.

The matching brake pads can be ordered separately.

The following axle versions are affected:

B19-19W	B9-19W	ZI9-19W
BIL9-19W	BL9-19W	ZIL9-19W
BILL9-19W	BLL9-19W	
BIR9-19W		

As an alternative to the SBW1937 (Wabco PAN 19-1), we recommend our 19.5" Haldex disc brake SBS1918H0.
