

**SAF-HOLLAND Completes CBXA AeroBeam™ Fixed Frame Suspension Series with New CBXAS25, CBXAS30 Models**

Muskegon, Michigan, June 4, 2026 – SAF-HOLLAND, a leading global manufacturer of heavy-duty commercial vehicle components, SAF-HOLLAND is pleased to announce the expansion of its CBXA AeroBeam™ Series of Fixed Frame Suspensions with the introduction of the new CBXAS25 and CBXAS30 models. The new suspensions complete the CBXA fixed frame lineup, joining the CBXAN23 and CBXAS23 models introduced in 2022.

The CBXA AeroBeam Series is the industry’s lightest weight line of top mount fixed frame trailer air suspensions and is engineered to provide the ideal balance of strength, durability, and weight savings for demanding on-highway and on/off-highway applications. The complete CBXA AeroBeam Series now includes 23K-, 25K-, and a true 30K-pound-capacity models designed for tanker, bulk hauler, refrigeration, platform, and specialty trailer applications.

“Our commitment continues to be designing products that help fleets improve efficiency, durability, and overall trailer performance,” said Lance Gage, Senior Product Manager, Trailer Axles & Suspension Systems – Americas. “With the addition of the CBXAS25 and CBXAS30, the CBXA family now provides customers with a complete range of lightweight fixed frame suspension solutions engineered for today’s demanding transportation environments.”

Built around SAF-HOLLAND’s advanced AeroBeam design, the CBXA AeroBeam Series combines lightweight construction with proven structural durability. The lightweight cast steel trailing arm beam delivers long service life while minimizing overall system weight. An integral shock absorber design improves ride performance while enhancing undercarriage clearance and protection from road debris.

The CBXA AeroBeam series is designed to reduce maintenance and extend suspension life. A pivot connection tension control bolt maintains proper clamp force, eliminating the need for routine re-torquing while preventing premature bushing and frame bracket wear that can contribute to tire wear.

The patented SwingAlign™ system allows for quick and accurate axle alignment without disassembly or replacement parts, helping fleets maintain proper tire tracking and reduce tire wear.

For enhanced braking performance, simplified maintenance, and lower total cost of ownership, the CBXA AeroBeam series is standard with the SAF-HOLLAND P89™ air disc brake or the optional P89 PSP7 air disc brake.

The CBXA AeroBeam Series also features a robust 5.75-inch diameter axle that is 19% more rigid than competitive axles, significantly reducing axle deflection to improve tire life and overall durability. The CBXAS25 and CBXAS30 models, featuring a 25K-rated axle, are available exclusively with parallel spindles for optimized performance and reliability.

To accommodate a wide range of trailer chassis designs, the CBXA AeroBeam Series is available with multiple frame bracket configurations including weld-on, weld-on with wing and bolt-on options. And it's available in ride heights ranging from 14- to 17-inch, axle track widths of 71-1/2-, 77-1/2-, or 83-1/2-inch, and can be equipped with the Posi-Lift option.

Engineered for long-term reliability and performance, the CBXA AeroBeam fixed frame suspension series is backed by SAF-HOLLAND's industry-leading warranty.

### **About SAF-HOLLAND Group**

SAF-HOLLAND SE is a leading international manufacturer of chassis-related assemblies and components for trailers, trucks and buses. An average of around 5,700 dedicated employees worldwide generated sales of EUR 1,734 million in 2025. The product range includes axle and suspension systems for trailers as well as fifth wheels and coupling systems for trucks, trailers, and semi-trailers as well as brake and EBS systems. In addition, SAF-HOLLAND also develops innovative products to increase the efficiency, safety, and environmental friendliness of commercial vehicles. With the brands SAF, Holland, Haldex, Assali Stefen, KLL, Neway, Tecma, V.Orlandi and York, the Group achieved strong market positions in the top three positions in the most important regions worldwide in 2025. SAF-HOLLAND supplies manufacturers in the original equipment market on six continents. In the aftermarket business, the company supplies spare parts to manufacturers' service networks and wholesalers as well as to end customers and service centers via an extensive global distribution network. SAF-HOLLAND SE is listed in the Prime Standard of the Frankfurt Stock Exchange and is included in the SDAX (ISIN: DE000SAFH001).
