Vehicle Technology Division

TEST REPORT

Concerning the braking system of certain vehicle categories in accordance with the ECE Regulation
R13.11

Test report number	: RDW-13R-0031174
0.1. Make	: SCHMITZ CARGOBULL
0.2. Type	: S.01
0.4. Category of vehicle	: O4
0.5. Name and address of the manufacturer	: SAF-HOLLAND GmbH Hauptstraße 26 63856 Bessenbach Germany
General	: The braking system complies with the requirements laid down in: - paragraph 5 of above-mentioned Regulation. See documentation: calculation WDE 94108S / WDE 94150S Test report 361 02 214 / drawing 112470 -W-00
Tests	: The tests have been conducted according to: Annex 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20 and 21 of the above mentioned Regulation.
Conclusion	: The type O test (laden and unladen) aswel as the parking brake test are carried out. The results can be found in this report
Tests conducted on	: 30 March 2015
By	: W.Hartman

Lelystad: 30 March 2015
The test engineer,

Test department

P.O. Box 777
2700 AT Zoetermeer
The Netherlands

Test centre

Talingweg 76
8218 NX Lelystad
The Netherlands

Vehicle Approval and Information

List of contents

- Reason for testing	: see below
- General information	: page 3
- Environmental information	: page 3
- Static Measurements	: Page 3
- Test accordance with the Annexes mentioned on page 1	: page 3 to 11
- General requirements	: page 12

General information

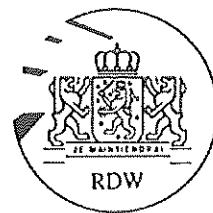

Make and type of the vehicle	SCHMITZ CARGOBULL S.01
Vehicle category	O4
Vehicle Identification Number	WSM00000003133433
Test conducted by	W.Hartman
Place	Lelystad
Date	30 March 2015

Environmental information

Date	30 March 2015
Road surface	Asphalt
Weather condition	Dry
Temperature	9 °C
Wind direction	WNW
Wind speed	6,2 m/s
Ambient pressure	1013 mbar
Relative humidity	73 %

Static measurements:

Maximum allowed weights (mass):					
king pin	15.000	kg			
Axle 1	9.000	kg			
Axle 2	9.000	kg			
Axle 3	9.000	kg			
Total	43.000	kg

Axle nr 3	0,7	0,7	0,7	0,7

5.1.4. Provisions for the periodic technical inspection of braking systems

5.1.4.5. Data for braking systems

The data of the compressed-air braking system for the functional and efficiency test must be specified at the vehicle in a visible position in indelible form, or made freely available in another way (e.g. handbook, electronic data recorder)

Sticker on the vehicle/Internet/Handbook

5.1.4.6. Reference braking forces

The reference of the brake force will be given on the trailer and/or into the manual instruction of the trailer or on the internet

Sticker on the vehicle/Internet/Handbook

5.2.2. VEHICLES OF CATEGORY O

The vehicle fulfils the requirements of paragraph 5.2.2.8.2. of the Regulation.

pass/fail/N/A See SAF instructions

Definition of the method by which wear may be assessed and definition of the maximum acceptable wear limit in accordance to 5.2.2.8.2.2. of the Regulation.

See Inspection instruction: SAF
(Will be made freely available)

Mandatory provisions for vehicles equipped with a vehicle stability function

The vehicle fulfils the requirements of paragraph 5.2.2.23. of the Regulation.

pass/fail/N/A

Does the position of the EBS module comply with the mounting instructions of the manufacturer?

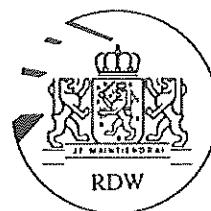

pass/fail/N/A

Verification of components and installation

pass/fail/N/A

Is the RSS function in the parameter EOL fields switched on? (only for trailers till 3 axles)

pass/fail/N/A

4. General requirements.
- 4.1. Is any electrical failure (supply, wiring) or sensor anomaly signalled to the driver by a specific optical warning signal? : pass/fail/N/A
- 4.1.1. Does the warning signal light up when the ABS-system is energised? : pass/fail/N/A
- Does the warning signal only extinguish if none of the in 4.1. mentioned defects are present? : pass/fail/N/A
- 4.1.2. Does the static sensor check verify that a sensor was not functioning the last time that the vehicle was at a greater speed than 10 km/h? : pass/fail/N/A
- The warning signal may light up again while the vehicle is stationary, provided that it is extinguished before the vehicle reaches 10 km/h when no defect is present.
- Does the electrically controlled pneumatic modulator cycle at least once during the above mentioned verification phase? : pass/fail/N/A
- 4.4. Does the electrical connection between the trailer and the towing vehicle conform to ISO Standard 7638-1985 or ISO/DIS Standard 7638-1996? (not for vehicles of category O1 and O2) : pass/fail/N/A
- The wiring specification of point 6.2 of ISO 7638-1985 or point 5.4. of ISO/DIS 7638-1996 for the trailer may only be reduced if the trailer is equipped with its own independent fuse. The rating of the fuse shall be such that the current rating of the conductors is not exceeded. With the exception of vehicles of categories N3 and O4, and until a uniform international standard has been agreed, the electrical connection between towing vehicles and trailers equipped with a 12 volt electrical system shall conform with DIN standard 72570, Part 4.
- 4.5. Is the residual braking performance in the event of a defect in the anti-lock braking system (according to point 4.1. of this Annex) at least 80% of the laden prescribed performance for the service braking system? : pass/fail/N/A
- 4.6. The operation of the anti-lock system shall not be adversely affected by magnetic or electrical fields. This shall be demonstrated by compliance with Regulation No. 10, 02 series of amendments. : pass/fail/N/A
- 4.7. Is there no manual device to disconnect the ABS or to change the control mode of the ABS? : pass/fail/N/A
- Only allowed on N2 and N3 OFF-ROAD vehicles under special conditions, see item 4.7.1. - 4.7.5. of Annex X.
- Annex XVIII Is the vehicle complying with the requirements of Annex 18 concerning complex electronics? See report RW TÜV EB 123.10E..... : pass/fail/N/A
