

## SAF Branded Drum Brake Shoes Introduced

**This product change notice applies to all SAF Drum Brake Axles.**

**Effective with shipments May 31, 2013**

### **Please Note:**

SAF-HOLLAND is pleased to announce that we will be launching a new SAF branded drum brake shoe with STEMCO lining with shipments starting May 31, 2013. Due to many customer requests, this change to our standard will be made to all SAF drum brake axles. Our top level part numbers will not change as we move to this new standard brake shoe. Abex® lining will be available as an option, but new part numbers and pricing will be required.

Please note that our brake shoe lining will also fall under the STEMCO seal failure warranty, where STEMCO will replace the friction and shoe if their seal leaks due to manufacture defect. Our SAF drum brake shoe will also qualify to be added to the new STEMCO PPS+7 Seven Year Wheel-End Warranty when specified on tapered or parallel axles.

Please contact your SAF-HOLLAND sales representative for more information or to answer any questions you may have.
