

Series launch of the new trailer disc brake SAF SBS1920H0 from July 2026

The **new 19.5" disc brake** opens up a new level of performance in the **11-ton axle load segment**. It was developed through close collaboration between chassis specialist **SAF-HOLLAND** and brake specialist **Haldex**, building on their many years of experience in the 9-ton segment – market launch from the third quarter of 2026.

Data of the new disc brake SAF SBS1920H0

Characteristic	SAF SBS1920H0
Dimensions of brake disc	Ø 377 x 45
Maximum axle load	11 t
Test load homologation	11 t
Maximum brake torque	20 kNm
Maximum permissible input force	12,4 kN
Maximum service brake chamber	24" BBA
Caliper weight incl. pads	31,5 kg
SAF part number left	03080012900
SAF part number right	03080013000
Test report number	TDB0897

New axle versions

Brake	Axle version
SBS1920H0	BI10-19S01
	BIL10-19S01
	SI11-19S01
	ZI11-19S01
	SIL11-19S01
	ZIL11-19S01

The new test report TDB0897, as well as the results of a type-0 road test already carried out, are now available to you online.
