

Introduction of brake pad quality SAF 577 in brake pad repair kits 3 057 0096 00 (SBS2220H0) and 3 057 0015 00 (SBS2220H01) as of March 2021

In the course of continuous product development and optimization, SAF-HOLLAND Aftermarket will introduce its own friction material quality SAF 577, which has been known and proven for years, into the disc brake pad set for its own brakes.

The following caliper types are affected:

SBS2220H0 = Brake pad set 3 057 0096 00
SBS2220H01 = Brake pad set 3 057 0015 00

SAF577 Brake Pad Quality Features

- High friction value stability over the entire service life
- High friction value stability in relation to temperature, speed and pressure
- Balanced wear behavior

Changeover date: March 2021

Important note: Current ECE R90 homologation available

In the course of the changeover, two back plate and spring designs are currently still used in the aftermarket.

Version „new“

Version „old“

For versions can be used until the final conversion. Brake pad sets are always packaged and shipped by type, so that mixed installation is excluded.
