

Axle version ZI9-22K01 and ZIL9-22K01 – classification of brake test report

From 01.09.2018 SAF-HOLLAND will change classification of brake reports to the axle versions **ZI9-22K01** and **ZIL9-22K01** in order to comply with changed requirements for vehicle homologation.

Changes will be effective at 01.09.2018.

	up to 31.08.2018	from 01.09.2018
ID1-	SBK2243	SBK2243
ID2-	SBK2243K01	SBK2243K01
ID3-	12753	10791
ID4-	36110103	36110303

There will be no change at the brake factor. The changes at ID3- and ID4- will require an update of already homologated vehicle series. To confirm qualitative reproducibility of the brake test reports in use, SAF-HOLLAND can give a statement to support communication with technical authorities.

The listed brake test report 36110303 is already in use at axle version SI9-22K01 and SIL9-22K01.

To find the brake test report please reach to the SAF-HOLLAND website under Sales / Test reports.
<http://www.safholland.de/de/en/sales/test-reports>

With the new classification, all axle base types SBK2243 with a maximum axle load of 9.000kg make use of brake test report 36110303.
