

Update of the Control Box of the SAF Tire Pilot TPRS System

As part of a face lift there is an upcoming change of the Control Box of the SAF Tire Pilot System.

In the way to provide stronger supply chains and secure availability of components in a demanding environment, there is an upcoming change at the Control Box of the SAF Tire Pilot System. The change will affect only SAF Tire Pilot Systems without connectivity to any EBS Brake System or Info Display. The new Tire Pilot Control Boxes will come with deliveries from begin of May 2025. The installation instruction and owner's manual will stay valid and unchanged. Scope of functionality will not change. There is no change on order process or part ID of SAF Tire Pilot Trailer – Kit.

Control Box with deliveries up to 04/2025

Control Box with deliveries from 05/2025

There is no change on scope of applications of the trailer or at the interface to the chassis framework. The split of the single outlet of pressurized air to the number of axles happen by T – couplings which are part of delivery.
