

Disc brake SBS 2220 H01 with KTL-coated brake caliper

Due to the current supply bottlenecks for disc brakes, SAF-HOLLAND will discontinue the coating of the brake calipers on the SBS 2220 H01 disc brake.

In order to meet the additional demand that has arisen in the short term and to increase production volumes, it is essential to phase out the coating. We hope that this measure will result in a higher output of brakes.

The following axle types are affected:

B9-22S, BL9-22S, BLL9-22S, BI9-22S, BIL9-22S, BILL9-22S, BIM9-22S, BIZL9-22S, BI10-22S, SI9-22S, ZI9-22S

This change does not affect the homologation.

Changeover date: end of June/beginning of July 2023

The part numbers of the axles and air suspension units do not change.
