

## SAF Air Disc Brake Actuators

### Product Change Notification

Effective: July, 2023 (**Revised**)

#### Attention:

SAF-HOLLAND is implementing a product change for air disc brake actuators used on SAF disc brake trailer axles. Beginning July 1, 2023, all disc brake wheel end packages (P89, P89 Plus, and PSP7) will include the Haldex LifeSeal+ actuator. The LifeSeal+ actuator is the industry's only fully sealed actuator and offers superior corrosion resistance. This change will be seen on all SAF trailer suspension models that are specified with a disc brake wheel end.

Both the 16/24 and 18/24 sized actuators will be updated. This change will not affect braking performance, product warranty, or installation as the new actuators are interchangeable with the current actuators. Fit, form and function are not affected.

If you have any questions or require additional product assistance, please contact your account manager or SAF-HOLLAND Customer Service at 1.800.876.3929.
