

SAF Drum Brake Axles - Spring Brake and Automatic Brake Adjusters

Product Change Notification

Effective: July, 2023

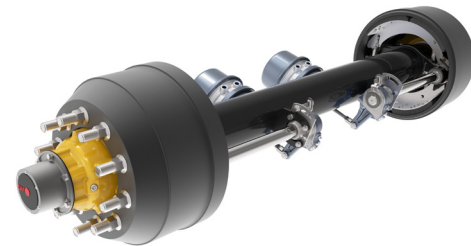

Attention:

SAF-HOLLAND is implementing a production change for spring brakes and automatic brake adjusters used on SAF drum brake trailer axles. Beginning July 1, 2023, all drum brake wheel end packages (SC5 and SC7) will include the Haldex GoldSeal spring brake and the Haldex automatic brake adjuster. The GoldSeal spring brake offers a robust, heat treated and powder coated power spring to reduce stress and improve corrosion resistance. The nylon reinforced diaphragm with self locating feature improves service life of the spring brake. The GoldSeal spring brake also offers a patented internal stroke indicator notifying customers when the brakes are out of adjustment. This change will be seen on all SAF trailer suspension models that are specified with a drum brake wheel end.

Both the 2430 and 3030 sized spring brakes will be updated. This change will not affect braking performance, product warranty or installation as the new spring brakes are interchangeable with the current spring brakes. Fit, form and function are not affected.

If you have any questions or require additional product assistance, please contact your account manager or SAF-HOLLAND Customer Service at 1.800.876.3929.
