

Product Change Notification – August 2022

SAF® Tire Pilot Plus™ (TPP) Regulator Assembly Upgrade – New Electronic Control Module Implementation

Effective: November 15, 2022

Attention

SAF-HOLLAND is implementing a production change for a new electronically controlled TPP regulator assembly to replace the current mechanical regulator assembly.

This new electronically controlled regulator will provide the following new features:

- Plug and Play – it will be a direct replacement per the chart below for the mechanical regulator assembly
- Improved control accuracy and pressure control capabilities
- Factory preset with sealed cover – no mechanical adjustments necessary
- Ability to digitally communicate via Bluetooth technology to smart phone app
- Easy ID – unit will have an identification decal with part number, serial number, and unit pressure setting
- The large cover decal includes a QR code for easy access to technical support information

This change will be implemented at the OEM/Aftermarket kit level per the introduction date noted above. The upper-level trailer OEM kit numbers will not change, just the regulator assembly number will be changed in the BOM of the kit.

Current Mechanical Regulator Assembly

PART NUMBER	REGULATOR PRESSURE SETTING
2116300000500	120
2116300000490	115
2116300000480	105
2116300000470	95
2116300000460	85
2116300000420	110
2116300000410	100
2116300000400	90
2116300000330	80

New Electronic Regulator Assembly

Identification Decal With:
PART NUMBER
SERIAL NUMBER
PRESSURE SETTING

NOTE: The new TPP electronic regulator assembly includes a new common connector with industry standard adapters that can interface with existing telematics units for the warning light status

PART NUMBER	REGULATOR PRESSURE SETTING
48100813	120
48100812	115
48100810	105
48100808	95
48100806	85
48100811	110
48100809	100
48100807	90
48100805	80
