

SAF Trailer Air Suspension and Mechanical Sliders

Slider pin linkages changing from 1/2" diameter to 3/8" diameter

Effective September 2015

Please Note:

SAF-HOLLAND will change the diameter of the pin linkage rods from 1/2" to 3/8" for all outside shim slider models (Figure 1). Inside shim models will not be affected. This change will not affect the form, fit, function, or durability of the locking mechanism. The new 3/8" diameter linkage rods are completely interchangeable with the previous 1/2" diameter design.

The following models are affected: CBX40, CBX46, CBX50, CBX69, ULX40, UltraLite and Z-Frame.

Please contact your SAF-HOLLAND sales representative for more information or to answer any questions you may have.
