

NEWAY ADZ Air-Ride Suspension

Product Enhancement ADZ Suspension Shock Absorber Upgrade

Effective: January 18, 2019

To support continuous product improvement, SAF-HOLLAND will be releasing an upgrade to the NEWAY ADZ suspension shock absorber. The new shock absorber part number 90045803 will replace 90045605.

NEWAY and ZF-Sachs engineering collaborated with the objective of improving the NEWAY ADZ suspension ride quality and handling. The new tuned shock was developed through a process of in-vehicle ride tuning along with over 20 months of successful field trials. Direct customer feedback validated the improved ride quality.

The following outlines the implementation steps and timing:

- September 14, 2018 – Notification letter response deadline
- October 12, 2018 – SAF-HOLLAND ECN to update kit BOM
- October 19, 2018 – Begin phase out of 90045605
- December 28, 2018 – Shock changeover.
- Est. January 18, 2019 – OEM implementation. Complete changeover and new shock begins shipping.

We are certain this enhancement to the ADZ product family will be well received. Please direct question regarding this change to:
