PH-410RN11	Air Cushioned Pintle Hook, 100k lbs. GTW, Hook Only

FAQS

How do I tell if my pintle hook is worn out?

The rule of thumb for wear out is when the wear on the horn of the pintle hook exceeds 1/8" from the original surface profile, or when the latch gap exceeds 3/8". It can be difficult to measure the wear accurately. Order a HOLLAND wear gage to easily and accurately measure the wear. See the chart to order the appropriate wear gage for your pintle hook.

PART NUMBER	WEAR
PH-550	TF-10520
PH-200, PH-210, PH-400, PH-400-H, PH-310, PH-405, PH-410	TF-10612
PH-760, PH-775	TF-10521
PH-T-60-AOL-8, PH-T-60-AOS-L-8, PH-30, PH-35	TF-10522
PH-30RP, PH-30SA, PH-30SB	TF-10960
