

MAX-VALVE™ UNIVERSAL HCV

Replaces a Multitude of Height Control Valves

**MAXIMUM
INTERCHANGEABILITY**

**MAXIMUM
RELIABILITY**

**MAXIMUM
COST SAVINGS**

Valve design simplicity that provides the maximum in variations, versatility, and performance.

The MAX-VALVE™ ride height control valve delivers:

- Quick and easy adjustment
- Reduced installation time
- Durability and performance reliability

90° push to connect fittings and several length control arms are included in every kit, allowing for easy replacement of height control valves on SAF, NEWAY and competitive suspensions.

The valve body can be mounted either horizontally or vertically with the option for the lever to be configured in whatever position best fits your application.

UNIVERSAL NON-DUMP HEIGHT CONTROL VALVE KIT

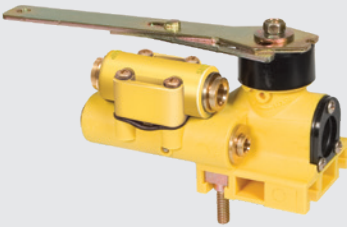

PART NUMBER **50860013**

Normal truck and trailer flow. Includes levers, mounting hardware and three 90° 3/8" push-to-connect elbow fittings.

UNIVERSAL PRESSURE DUMP HEIGHT CONTROL VALVE KIT

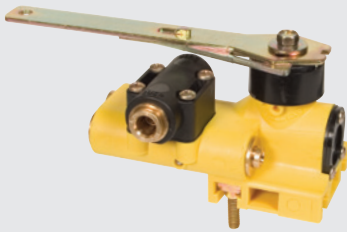

PART NUMBER **50860014**

Normal truck and trailer flow. Includes levers, mounting hardware and three 90° push-to-connect elbows and one 90° 1/4" push-to-connect elbow.

UNIVERSAL ZERO PRESSURE DUMP HEIGHT CONTROL VALVE KIT – Low Flow

PART NUMBER **50860016**
