Gabriel® Features and Benefits

Gabriel® keeps working long after the job is done.

Quality components, precision engineering and a durable, robust design ensure top performance throughout the life of Gabriel® heavy-duty shock absorbers, and reduce wear and tear on other costly suspension parts.

Drawn over Mandrel (D.O.M.) Inner Cylinder Tube

- Provides smooth surface on inner cylinder for piston seal and piston bearing face
- Less chance of scoring and better durability
- Higher tolerance on the inside diameter

Super-Finished Chromed Piston Rods

- Provides superior corrosion resistance, performance and product life

Bulged Design * *2

- Increased fluid capacity
- Lower operating temperatures
- Less internal wear due to heat dissipation

Pressurized, Floating Piston Seal Design

- Self-compensates for wear over shock life
- Rugged and durable design
- Less fade, more consistent performance over the full range
- Reduces force-velocity variabilities, increases control capabilities at low velocities

Forged Solid Steel Eye Rings and 360° Arc-Welded End Mounts*

- Greater tensile strength
- Reduces end mount failures

Triple Lip, Nitrile Rod Seal²

- Extra seal protection improves fluid retention
- Leads to longer product life

Hydraulic Extension Stop¹

- Unique and robust design
- Prevents shocks from topping out and suspensions from over-extending
- Significantly reduces fatigue in mounts, lights and other vibration sensitive components

10 Stage All Coil Spring Valving

- For comfort and control
- Enhanced durability
- Self-cleaning

GasSLX® - Features the benefits noted above, plus:

- Adjustable - 3 positions: Regular, Firm, Extra Firm
- Gas Cell - Separates gas from fluid
- Reduced fade
- High Temperature (H.T.) Fluid aids in operation at extreme conditions
- Multi-lip Viton Rod Seal - material withstands high temperatures

* Excluding some or all 83000 Series
** Including 85300 and 85700 Series

¹ Where required. ² Excluding GasSLX
Note: Features may vary by part number
